

CS 191 Workshop II - Project Description

Instructions:

1. Go to the updcs-cs191-solamo github repository (<https://github.com/rcsolamo/updcs-cs191-solamo>). Download the Project Description Template under the Requirements Documents. Use this template to create your project description document. It uses LibreOffice, an open-source productivity suite.
2. Create the project description document of your project and save it as a PDF document. Upload it as a file under 01-Project Documents under your github repository with the following filename format:

Project Description- <Project Name> - <Last Names of Group Members>.pdf

Eg. Project Description - PureverCat - SolamoFeriaPaje.pdf

3. Reply to the assignment post containing a link to your project's github repository.

Workshop Assessment - Project Description Document Checklist:

- Availability
- Document Compliance
- Suitability
- Readability
